AuthPrescript®

AuthPrescript + Clinic OP + Soko La Dawa is an integrated system that offers pharmaceutical companies the ability to expose their brands to doctors, patients and the public at the point of prescription and provide data insights on the movement and popularity and of their drugs and other products.

AuthPrescript is accessible by medical professionals via web browsers (http://authprescript.com) or as a desktop application or mobile phone application and that may be used to create, price, authenticate and share medical prescriptions online and also offline.

1. The software is backed by a database of Names of Drugs, Detailed Descriptions, Images and Prices of Drugs.

2. The software contains a facility for previewing more information about any drug on the prescription list.

3. The software is contains a facility for previewing drugs in the same drug category as the prescribed drug and for substituting a prescribed drug with any other of those shown.

4. The software contains a facility for providing estimate cost for each drug on the prescription and the total estimated cost of the entire prescription.

5. The software contains a facility for sending (sharing) the prescription online via email or to other applications or printing the prescription for offline sharing.

cybermonk
software development

1. Instant preview of information and comprehensive documentation about any drug information including images at the point of prescription (POP)

2. Instant authentication of prescriptions online to determine origin and number of refills.

3. Accurate and clearly legible prescriptions to prevent rejection or sending patients back to doctor and calling the doctor

4. Instant estimate of cost of each item and total cost of prescription

5. Provision of suitable drug substitutes at the point of prescriptions based active ingredient and affordability

6. Digital (Paperless) Prescriptions going into the future to reduce stationery use & printing costs

7. Shareable prescription via email and other platforms
